-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 14-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on 1/03/06.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsutani et al. (US 5,461,210).

Regarding claims 1-2, Matsutani discloses a method for joining a precious-metal section (4A) to an electrode (10) of a spark plug, comprising: positioning the precious-metal section (4A) on the electrode (10); and applying a laser beam (LB) at least to the precious-metal section (4A) positioned on the electrode (10), wherein the precious-metal section is joined to the electrode by heat input generated by the laser beam (LB), and wherein the laser beam at least substantially covers the precious-metal section and no relative movement occurs between the laser beam and the precious-metal section during the application of the laser beam (for example, see Fig. 3a and col. 3, lines 2-47).

Allowable Subject Matter

Claims 3-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Prior art fails to disclose or fairly suggest:

- The method of laser welding wherein the laser beam substantially covers the precious metal section and has at least two portions wherein the intensities of the two portions differ, in combination with the remaining claimed limitations as called for in claim 3 (claims 4-13 would be allowable for the same reasons since they are dependent on claim 3).

Other Prior Art Cited

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Matsutani (US 5,395,273) reads on claims 1-2 (for example, see Figs. 2a-2c).
